

Herectus & \$BIGD token

A unique reward-driven ecosystem powered by a product-bound token.

- Real product behind
- Profit sharing mechanism
- Rising price floor
- Holders motivation
- Anti bot and dump protection
- Locked liquidity
- Vested team

Introduction

Herectus is a highly concentrated extract of traditional herbs and important amino acids that have a strong positive impact on sexual life.

Herectus pills increase blood flow into genital organs, boost sex hormone levels, semen production and improve mood, which leads to increased sexual desire, more powerful and intense orgasms, enhanced sexual performance, stamina and vigor, thicker and harder erections, higher self-esteem and lower stress.

To create a unique reward-driven ecosystem Herectus introduces the \$BIGD product-bound token. All Herectus products are priced in USD but available to buy using \$BIGD token. \$BIGD holders are rewarded with profit share, product discounts and access to premium features.

Who benefits and why

Token's price floor is continuously risen by a 5% profit share of each product sale and by a 3% transaction fee, which are being put into the liquidity pool and holders' wallets. Plus to ensure fairness and longevity, we've put in place dumping restrictions, whale control as well as vesting for all team members to prevent price shocks.

Herectus \$BIGD presales:
